REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record, Parra et al. (6,167,417) shows that it is well known for a signal processing system to contain a loudspeaker for playback of audio content and a multi-channel signal processing system. In regard to claims 1, 13, and 23-25, Parra et al. do not specifically show that the multi-channel signal processing system is configured to receive speech utterance input from a sound transducer and from at least one additional audio source, the signal processing system being operative to enhance the recognition quality of the received speech utterance, a switching system coupled to said signal processing system and to said loudspeaker system, the switching system being operative to selectively couple said loudspeaker system to said signal processing system thereby utilizing said loudspeaker system as said additional audio source. In regard to claims 26, 36 and 37, Parra et al. do not specifically show an acoustic model selection system coupled to said recognition system and being operative to selectively control the acoustic model used by said recognition system based on at least one environment parameter; said acoustic model selection system further using said loudspeaker system to assist in determining the acoustic model used by said recognition system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
